Certification of Attendance for the Summer School for Sustainability

We hereby certify

Zahra Chehreghan, Matriculation Number [redacted]

the participation in the „Summer School for Sustainability“ with an amount of 3 Credit Points.

The summer school aims to build awareness for sustainability and integrate it into the participants' perspective for their daily and professional lives. Therefore, the Sustainable Development Goals (SDGs), adopted by the United Nations in 2015 as a blueprint to achieve a better and sustainable future for all, and the reports of the Intergovernmental Panel on Climate Change (IPCC), which assess the advance of scientific knowledge about climate change, are utilized. The participants are divided into topic-centered groups in order to work on the 17 SDGs and most recent IPCC reports, taking the chapters of the IPCC reports as a starting point and close the course with an assessed poster presentation. Through the course, the participants learn to set their own perspective with respect to the IPCC and the SDGs and reflect on how to implement them in their daily routines.

Best regards

Dr. Henning Moldenhauer
Head of Sustainability Office TU Dortmund
